# WHAT IS ORIGAMI?

If you've ever seen paper folded into the shape of an animal, boat, box, flower, or any number of things, you were probably looking at a work of origami.

Origami is the ancient art of paper folding. It has been around since paper was invented—more than a thousand years ago! The magic of origami is that you don't need glue or scissors to create these mini works of art. Folding techniques transform a square or rectangular piece of paper into a 3D shape.

Origami is a practice in patience, fine motor skills, and creativity. It will help you develop important skills that can be used in math, art, science, and . . .

making new friends!

# MAKE YOUR OWN ORIGAMI BOAT

2

4

You'll need a rectangular piece of paper to make this boat. Choose your favorite color. (If your piece of paper only has color on one side, start with the colored side up.)

Next, fold it in half from top to bottom. Leave it folded.

Now, take the bottom edge of the upper layer and fold it upward.

Fold it in half from left to right, then open it back up.

Bring the top two corners to the center line and crease well. The shape of your boat is beginning to reveal itself!

Flip your paper and do the same to the other side. Crease well.

### FROM YUNA'S CARDBOARD CASTLES

### ... THAT CAN ACTUALLY FLOAT!

Pull the sides out and flatten. Your paper should now look like a square.

Pull the sides apart again and flatten.

Flatten all the creases that need to be flattened, and give the boat's sail a gentle tug to straighten it out.

While looking at your paper like a diamond, fold the front layer up to the top, then do the same at the back.

This is the fun part! Gently pull the top parts of the model outward. You should now see the shape of your origami boat.

There you have it! Where will you sail away to in your origami boat?
